

# FUND UPDATE

## MERCER HIGH GROWTH FUND MERCER FLEXISAVER

### Quarter ending 30 June 2017

This fund update was first made publicly available on: 30 November 2017.

This is a replacement fund update. It replaces the 30 June 2017 Mercer FlexiSaver - Mercer High Growth Fund fund update first made publicly available on 28 July 2017. The following changes have been made in the replacement fund update:

- other management and administration charges, total management and administration charges and total fund charges have been updated;
- footnote 4 has been expanded to clarify the updated management and administration charges.

## WHAT IS THE PURPOSE OF THIS UPDATE?

This document tells you how the Mercer High Growth fund has performed and what fees were charged. The document will help you to compare the fund with other funds. Mercer (N.Z.) Limited prepared this update in accordance with the Financial Markets Conduct Act 2013.

This information is not audited and may be updated.

## DESCRIPTION OF THIS FUND

The High Growth fund invests almost entirely in shares and real assets, with only a small amount invested in cash and fixed interest. This fund may be suitable for investors seeking a well diversified fund, who want higher long-term returns and are comfortable with more volatility in returns.

|                         |                |
|-------------------------|----------------|
| Total value of the fund | \$2,459,567    |
| Date the fund started   | 9 October 2015 |

## WHAT ARE THE RISKS OF INVESTING?

### Risk indicator for the Mercer High Growth fund<sup>†</sup>:

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at [www.sorted.org.nz/tools/investor-kickstarter](http://www.sorted.org.nz/tools/investor-kickstarter).

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for 5 years to 30 June 2017. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the Product Disclosure Statement (PDS) for more information about the risks associated with investing in this fund.

<sup>†</sup> A combination of actual fund returns and market index returns have been used to determine the risk indicator as the fund commenced operation on 9 October 2015. The risk indicator may therefore provide a less reliable indicator of the potential future volatility of the fund. For the five year period ending 30 June 2017 market index returns have been used up to 30 November 2015 with actual fund returns used for the balance of the period to 30 June 2017.

## HOW HAS THE FUND PERFORMED?

|  | Past year |
|--|-----------|
| <b>Annual return<sup>1</sup></b><br><i>(after deductions for charges and tax)</i>        | 12.64%    |
| <b>Annual return<sup>1</sup></b><br><i>(after deductions for charges but before tax)</i> | 14.23%    |
| <b>Market index annual return</b><br><i>(reflects no deductions for charges and tax)</i> | 12.27%    |

The market index return is the strategic asset allocation weighted benchmark index return, where the benchmark indices are defined in the Statement of Investment Policy and Objectives. Additional information about the market index is available on the offer register.

This shows the return after fund charges and tax for each year ending 31 March since the fund started. The last bar shows the average annual return since the fund started, up to 30 June 2017.<sup>2</sup> Note that market indices reflect no deduction for charges and tax.

**Important:** This does not tell you how the fund will perform in the future.

Returns in this update are after tax at the highest prescribed investor rate (PIR) of tax for an individual New Zealand resident. Your tax may be lower.

## WHAT FEES ARE INVESTORS CHARGED?

Investors in the Mercer High Growth fund pay fund charges. In the year to 31 March 2017 these were:

|  | % of net asset value                           |
|--|--|
| <b>TOTAL FUND CHARGES</b>                          | 1.40%  |
| Which are made up of:                              |  |
| <b>TOTAL MANAGEMENT AND ADMINISTRATION CHARGES</b> | 1.40%  |
| Including:   |  |
| Manager's basic fee                                | 0.92% <sup>3</sup>                             |
| Other management and administration charges        | 0.48% <sup>4</sup>                             |
| <b>TOTAL PERFORMANCE BASED FEES</b>                | 0.00%  |
| <b>OTHER CHARGES</b>                               | <b>Dollar amount per investor</b> <sup>5</sup> |
| Membership Fee                                     | Nil or \$30                                    |

\*Note: Included within 'Other management and administration charges' are performance-based fees charged by external managers of underlying funds that the fund invested into of 0.21%. Over the past five years, performance based fees have averaged 0.07% using data from similar funds Mercer manages. Performance-based fees are subject to market movements and external manager performance and the amount of these fees may differ from those disclosed for the year 31 March 2017.

These are not included in the line 'Total Performance Based Fees' as this line relates to any performance based fee paid directly to the Manager.

Investors are not currently charged individual action fees for specific actions or decisions (for example, for withdrawing from or switching funds). See the Mercer FlexiSaver scheme PDS for more information about Scheme fees. Small differences in fees and charges can have a big impact on your investment over the long term.

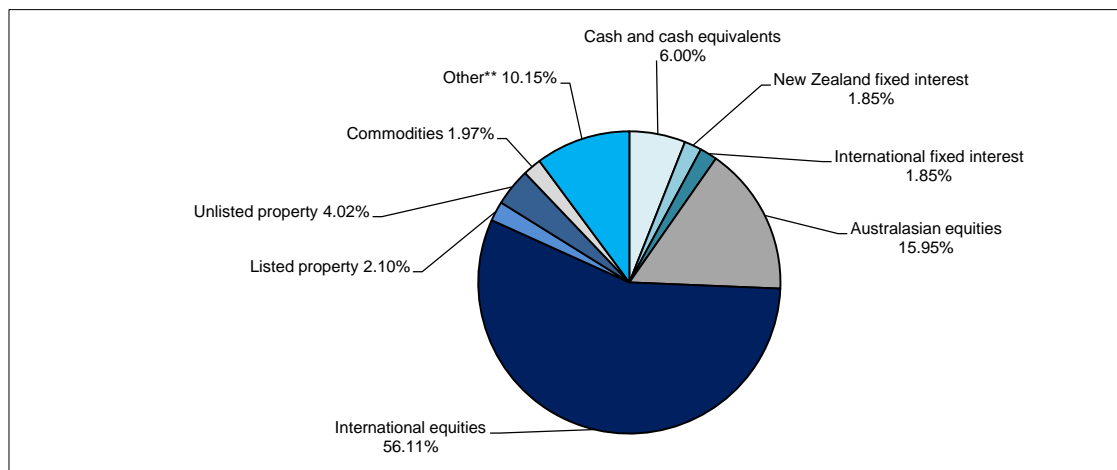

## EXAMPLE OF HOW THIS APPLIES TO AN INVESTOR

Ben had \$10,000 in the fund at the start of the year and didn't make any further contributions. At the end of the year, Ben received a return after fund charges were deducted of \$1264.00 (12.64% of his initial \$10,000). Ben also paid \$30.00 in other charges. This gives Ben a total return after tax of \$1234.00 for the year. <sup>6</sup>

## WHAT DOES THE FUND INVEST IN?

### Actual investment mix

This shows the types of assets that the fund invests in. <sup>7</sup>

\*\*Includes listed and unlisted infrastructure assets and alternatives

## TARGET INVESTMENT MIX

This shows the mix of assets that the fund generally intends to invest in.

|                              |        |
|------------------------------|--------|
| Cash and cash equivalents    | 2.00%  |
| New Zealand fixed interest   | 2.00%  |
| International fixed interest | 6.00%  |
| Australasian equities        | 18.00% |
| International equities       | 53.00% |
| Listed property              | 3.50%  |

## TOP 10 INVESTMENTS

| Name   | % of fund net assets | Type                       | Country       | Credit rating (if available) |
|--|----------------------|----------------------------|---------------|------------------------------|
| 1 Schroder Global Core Fund                                      | 8.96%                | International equities     | Australia     | NA                           |
| 2 AMP Capital Investors NZ Cash Fund                             | 2.67%                | Cash and cash equivalents  | New Zealand   | NA                           |
| 3 Fidelity Select Global Small Cap Fund                          | 1.97%                | International equities     | Australia     | NA                           |
| 4 Blackrock Global Enhanced Emerging Markets Fund - E Class      | 1.95%                | International equities     | Australia     | NA                           |
| 5 ANZ Wholesale Sovereign Bond Fund                              | 1.83%                | New Zealand fixed interest | New Zealand   | NA                           |
| 6 iShares Trust Core S&P 500 ETF                                 | 1.81%                | International equities     | United States | NA                           |
| 7 Westpac Business Interest Account                              | 1.69%                | Cash and cash equivalents  | New Zealand   | AA-                          |
| 8 Fisher & Paykel Healthcare Corporation Limited                 | 1.66%                | Australasian equities      | New Zealand   | NA                           |
| 9 BNP New Zealand Dollar Custodial Account High Growth Portfolio | 1.61%                | Cash and cash equivalents  | New Zealand   | NA                           |
| 10 First State Investments Global Listed Infrastructure Fund     | 1.40%                | Other**                    | New Zealand   | NA                           |

\*\*An investment in a fund that is primarily comprised of listed infrastructure assets.

The top 10 investments make up 25.55% of the fund.

### Currency hedging

Currency hedging can apply to some of the asset classes this fund invests in. The level of currency hedging for global shares is managed between 0% and 100% and may change over time depending on Mercer's view of the relative strength (or weakness) of the New Zealand dollar. Other global assets classes (Global Fixed Interest and Real Assets), target a 100% net of tax hedge to the New Zealand dollar. Refer to the Statement of Investment Policy and Objectives for more information which is available from [www.companiesoffice.govt.nz/disclose](http://www.companiesoffice.govt.nz/disclose).

## KEY PERSONNEL

## FURTHER INFORMATION

You can also obtain this information, the PDS for the Mercer FlexiSaver scheme and some additional information from the offer register at [www.companiesoffice.govt.nz/disclose](http://www.companiesoffice.govt.nz/disclose).

## NOTES

1. Returns may vary for some investors depending on the fund charges applicable to them.
2. The average annual return is from 30 November 2015.
3. The managers basic fee varies for some investors including those who joined through an employer based group. Therefore, as one standard fee is not able to be used, the amounts stated have been calculated based on the fees incurred over the average net asset value for the year calculated on a monthly average basis due to the opening value not being representative of the scheme year. The actual fee charged to investors may be higher or lower.
4. Other management and administration charges include the use of average charges which means that the fee applicable to some investors, including those who joined through an employer based group, may be higher or lower. The supervisor and custodian fee included in other management and administration charges has been calculated based on the unit price deduction for the year ended 31 March 2017.
5. Other charges in the form of an administration fee of up to \$2.50 per investor per month (\$30.00 per year) can apply to some investors who join through an employer based group.
6. Returns may vary for some investors depending on the fund charges applicable to them. Returns may also differ for some investors who do not incur the other charges shown.
7. For asset allocation reporting purposes cash retained for liquidity management at a sector level is assigned to the asset class to which it relates to and is not separately identified.
8. For the Quarter ending June 2017, Philip Graham has also held the role of Acting Chief Investment Officer – Pacific, Mercer Australia (Pty) Ltd.
