WHAT ARE THE RISKS OF INVESTING?

Risk indicator for the Mercer Cash fund:†

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at www.mercerfinancialservices.co.nz/riskprofile.

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for 5 years to 30 June 2018. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

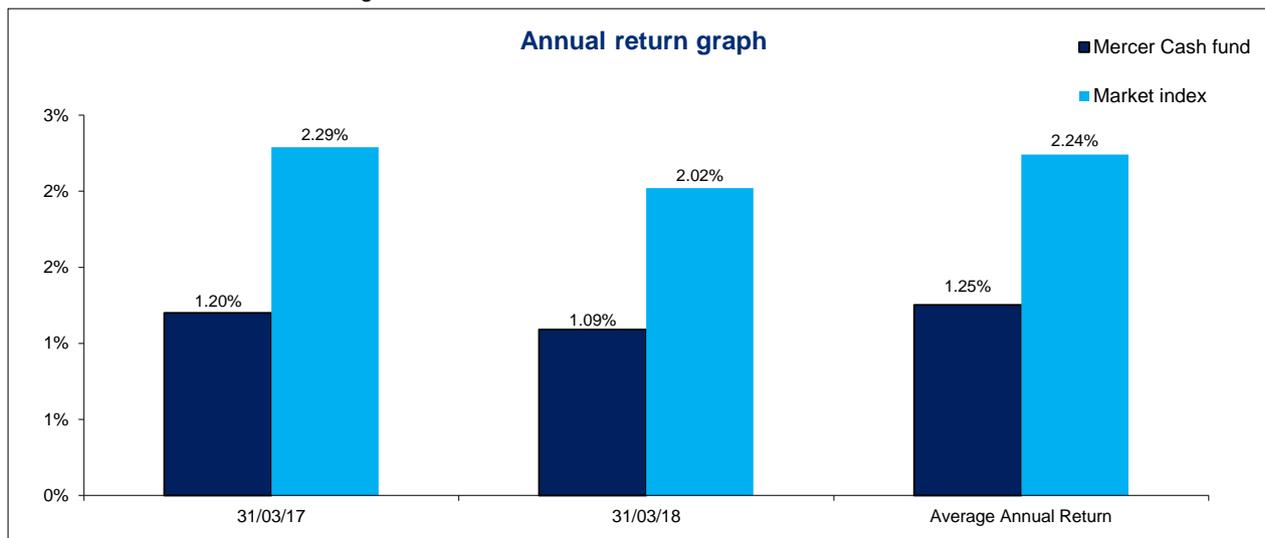

See the Product Disclosure Statement (PDS) for more information about the risks associated with investing in this fund.

† A combination of actual fund returns and market index returns have been used to determine the risk indicator as the fund has less than 5 years of actual returns. The risk indicator may therefore provide a less reliable indicator of the potential future volatility of the fund. For the five year period ending 30 June 2018, market index returns have been used up to 30 November 2015 with actual fund returns used for the balance of the period to 30 June 2018.

HOW HAS THE FUND PERFORMED?

	Past year
Annual return¹ <i>(after deductions for charges and tax)</i>	1.14%
Annual return¹ <i>(after deductions for charges but before tax)</i>	1.59%
Market index annual return <i>(reflects no deductions for charges and tax)</i>	2.00%

The market index return is the strategic asset allocation weighted benchmark index return, where the benchmark indices are defined in the Statement of Investment Policy and Objectives. Additional information about the market index is available on the offer register.

This shows the return after fund charges and tax for each year ending 31 March since the fund started. The last bar shows the average annual return since the fund started, up to 30 June 2018. Note that market indices reflect no deduction for charges and tax.²

Important: This does not tell you how the fund will perform in the future.

Returns in this update are after tax at the highest prescribed investor rate (PIR) of tax for an individual New Zealand resident. Your tax may be lower.
