

FUND UPDATE

MERCER HIGH GROWTH FUND MERCER FLEXISAVER

Quarter ending 30 September 2016

This fund update was first made publicly available on: 31 October 2016

WHAT IS THE PURPOSE OF THIS UPDATE?

This document tells you how the Mercer High Growth fund has performed and what fees were charged. The document will help you to compare the fund with other funds. Mercer (N.Z.) Limited prepared this update in accordance with the Financial Markets Conduct Act 2013.

This information is not audited and may be updated.

DESCRIPTION OF THIS FUND

The Mercer High Growth fund invests almost entirely in shares and real assets, with only a small amount invested in cash and fixed interest. This fund may be suitable for investors seeking a well diversified fund, who want higher long-term returns and are comfortable with more volatility in returns.

Total value of the fund	\$1,464,480
The date the fund started	9 October 2015

WHAT ARE THE RISKS OF INVESTING?

Risk indicator for the Mercer High Growth fund[†]:

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at www.sorted.org.nz/tools/investor-kickstarter.

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for 5 years to 30 September 2016. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the Product Disclosure Statement (PDS) for more information about the risks associated with investing in this fund.

[†] A combination of actual fund returns and market index returns have been used to determine the risk indicator as the fund commenced operation on 9 October 2015. The risk indicator may therefore provide a less reliable indicator of the potential future volatility of the fund. For the five year period ending 30 September 2016, market index returns have been used up to 30 November 2015 with actual fund returns used for the balance of the period to 30 September 2016.

MAKE TOMORROW, TODAY

HOW HAS THE FUND PERFORMED?

	PAST YEAR
Annual return <i>(after deductions for charges and tax)</i>	Not applicable
Annual return <i>(after deductions for charges but before tax)</i>	Not applicable
Market index annual return <i>(reflects no deductions for charges and tax)</i>	13.47%

The market index return is the strategic asset allocation weighted benchmark index return, where the benchmark indices are defined in the Statement of Investment Policy and Objectives. Additional information about the market index is available on the offer register.

WHAT FEES ARE INVESTORS CHARGED?

Investors in the Mercer High Growth fund pay fund charges. Based on the PDS dated 30 September 2015 these are expected to be¹:

	% OF NET ASSET VALUE
TOTAL FUND CHARGES	1.37% (estimate)^{2, 3}
Which are made up of:	
TOTAL MANAGEMENT AND ADMINISTRATION CHARGES	1.37% (estimate)^{2, 3}
Including:	
Manager's basic fee	1.22% ²
Other management and administration charges	0.15% (estimate) ^{2, 3}
TOTAL PERFORMANCE BASED FEES	0.00%

Dollar amount per investor

OTHER CHARGES

Administration Fee	\$30.00 ²
--------------------	----------------------

Investors are not currently charged individual action fees for specific actions or decisions (for example, for withdrawing from or switching funds). See the Mercer FlexiSaver scheme PDS for more information about Scheme fees.

Small differences in fees and charges can have a big impact on your investment over the long term.

EXAMPLE OF HOW THIS APPLIES TO AN INVESTOR

Ben had \$10,000 in the fund at the start of the period and didn't make any further contributions. At the end of the period, Ben received a return after fund charges were deducted of \$334.00 (that is 3.34% of his initial \$10,000). Ben also paid \$25.00 in other charges. This gives Ben a total return after tax of \$309.00 for the period.^{4, 5}

10	Westpac Business Interest Account	1.44%	Cash and cash equivalents	New Zealand	AA-

The top 10 investments make up 25.82% of the fund.

Currency hedging

Currency hedging can apply to some of the asset classes this fund invests in. The level of currency hedging for global shares is managed between 0% and 100% and may change over time depending on Mercer's view of the relative strength (or weakness) of the New Zealand dollar. Other global assets classes (Global Fixed Interest and Real Assets), target a 100% net of tax hedge to the New Zealand dollar. Refer to the Statement of Investment Policy and Objectives for more information which is available from www.companiesoffice.govt.nz/disclose.

FURTHER INFORMATION

You can also obtain this information, the PDS for Mercer FlexiSaver and some additional information from the offer register at www.companiesoffice.govt.nz/disclose.

NOTES

- 1 As the fund commenced on 9 October 2015 PDS fee data was used for the fund charges table. The PDS version used was dated 30 September 2015 as this was the most recent version available at the time this fund update was first made publicly available.
- 2 Fund charges may vary for individual investors and employer based groups. Other charges in the form of an administration fee of up to \$2.50 per investor per month (\$30.00 per year) can apply to some investors who join through an employer based group.
- 3 Other management and administration charges include estimates for certain costs and expenses likely to be incurred such as audit, legal and other professional services, and printing and distribution costs. The determination of these fees is based on estimates provided by the Scheme's professional service providers and Mercer's experience with other schemes it manages.
- 4 Returns may vary for some investors depending on the fund charges applicable to them. Returns may also differ for some investors who do not incur the other charges shown.
- 5 The period used for this example is 1 December 2015 to 30 September 2016 as December 2015 was the first full month investors at the 28% PIR were present in the fund. The membership fee of \$25.00 applied relates to this actual return period.
- 6 For asset allocation reporting purposes cash retained for liquidity management at a sector level is assigned to the asset class to which it relates to and is not separately identified.
