WHAT ARE THE RISKS OF INVESTING?

Risk indicator for the Mercer Balanced fund:

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at www.mercerfinancialservices.co.nz/riskprofile.

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for 5 years to 31 March 2019. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the Product Disclosure Statement (PDS) for more information about the risks associated with investing in this fund.

Performance-based fees are subject to market movements and external manager performance for any given period may materially differ from those disclosed for the year 31 March 2018.

These are not included in the line 'Total Performance Based Fees' as this line relates to direct charges from the manager.

Investors are not currently charged individual action fees for specific actions or decisions (for example, for withdrawing from or switching funds). See the Mercer KiwiSaver scheme PDS for more information about Scheme fees. Small differences in fees and charges can have a big impact on your investment over the long term.

At the end of the year, Ben received a return after fund charges were deducted of \$504.00 (5.04% of his initial \$10,000). Ben also paid \$30.00 in other charges. NOTES

1. The benchmark is a composite of market, peer group and absolute return indices. The absolute return indices were used up to 30 September 2018. A composite has been used as market indices are not applicable for some of the asset classes in this fund. The composite index may be a less reliable indicator of performance than a market index.

Additional detail regarding indices can be found on the Disclose register www.disclose-register.companiesoffice.govt.nz/

2. Underlying external performance based fees and underlying in-fund costs have been estimated based on data available to 31 March 2018.

3. Membership fees are the fixed dollar charges for membership of the scheme. A lower membership fee may apply for some investors.

4. The fees disclosed are on a GST exclusive basis.

5. For the reporting of the types of assets under Actual investment mix and Top 10 investments, cash retained for liquidity management at a sector level is assigned to the asset class to which it relates to.

6. Ronan McCabe has not been named as a key person in the previous fund update as he was appointed on 25 March 2019.
